DETAILED ACTION

1. Claims 1, 5, are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The interfacing between a prepaid and a billing system is vague and indefinite. It is not clear how this further limits the system for providing "prepaid services" nor is it clear what the scope of interfacing includes. Also, the means for switching from the prepaid services to postpaid services is vague and indefinite. What are the characteristics of a postpaid account? Upon switching, is the prepaid account replaced? In the claims, a system, method and computer readable medium for providing access to the prepaid services through a point of sale is vague and indefinite. It is not clear what is being accessed.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over US Patent 6,502,745 in view of US Patent 6070067.

The teaching of the primary reference is of record. The applicant challenged the official notice that that the variable of extending credit for the purpose of increasing sales is well known in the retailing art. It would have been obvious for one skilled in that art at the time to have implemented the postpaid practice (i.e., extending credit) as motivated by the need to retain customers and increase sales. The examiner takes official notice that using art recognized variables for their art recognized results is per se obvious. The secondary

reference teaches that it is well known in the art to add a postpaid/billing feature to a prepaid account.

(See figure 2 and accompanying text.)

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
